

# Soil tests: deciphering & decision making

We all know fertiliser is a significant cost in growing pasture.  
Make sure you are getting maximum pasture production  
out of your fertiliser investment.

## What?

A 'hands-on' 4 hour workshop, presented by Luke Taylor, Ag Assist, covering:

- What do the soil test number mean?
- What are the critical levels for nutrients, pH and salinity to optimise pasture production?
- Is pH or nutrients more important to boost my production levels?
- How to use soil test data to develop a farm fertiliser and lime program
- Learn how to make more strategic and profitable decisions about where, what and how much to invest in fertiliser on your farm, to maintain and build soil fertility and optimise production levels
- Bring along your recent soil tests to work through during the workshop
- Group discussion about the key soil constraints holding back pasture production in the area

## Where & when?

Where	When
Scottsdale Football Club (Nugget Sellers Pavilion)	3.30 pm to 8 pm Wednesday 17th February 2016

*\$50 per farm business which includes a BBQ dinner. Please RSVP. to Kylie Jordan:*

Ph: 6427 5300 E: [kjordan@macfrank.com.au](mailto:kjordan@macfrank.com.au)

BBQ Dinner provided by:

Co-sponsored by:

More Beef from Pastures and Making More from Sheep in Tasmania is coordinated by:
